HEALTH SUPPLEMENT

Think of your kidney and blood health as a lifelong journey—one that we are traveling together.

To keep your path smooth, energy high, and heart protected, I recommend these essential steps for the road ahead:

- ✓ Monitor Hb & Ferritin routinely as advised by doctor
- ✓ Follow kidney-safe dietary intake (controlled sodium)
- ✓ Take prescribed iron therapy without skipping doses
- ✓ Choose stomach-friendly, non-constipating iron
- ✓ Maintain kidney-safe hydration & regular activity

INTEGRAL THERAPEUTIC
Hoppier Healthier Harmony

Mr. Jain has been battling chronic fatigue for months. Even taking a few steps or walking across the room leaves him breathless and exhausted.

Doctor, my energy is zero. But last time I took iron tablets, my stomach felt on fire and the constipation was unbearable! I can't take them again.

Your Hb has dropped to 8.8 g/dL. What you experienced were common side effects of conventional iron, Mr. Jain. Today, science offers a much gentler, advanced solution.

WHY DO CKD PATIENTS EXPERIENCE LOW IRON?

Kidneys produce less erythropoietin (EPO) in CKD

Poor dietary absorption & high hepcidin levels block regular iron

Fewer red blood cells & severe exhaustion

Reference: KDIGO Clinical Practice Guideline for Anemia in CKD.

A Public Awareness Initiative by Integral Therapeutic.

INTEGRAL THERAPEUTIC
Happier Healthier Harmony

A friend told Mr. Jain that the only effective iron supplements are derived from non-vegetarian sources, leaving him conflicted about his beliefs.

FACT CHECK & CLINICAL ADVANTAGE SECTION

COMMON MYTH

Potent iron therapy always requires animal-derived heme sources.

MEDICAL FACT

- 100% Non-Heme, Pure Veg Origin (Acceptable to all communities)
- Complete Therapeutic Efficacy (Delivers 100% RDA Elemental Iron (29 mg) without animal constituents)
- Certified Green Dot Standard 

KEY TAKEAWAYS FOR PATIENTS

- ✓ Zero lifestyle or religious compromise
- ✓ Doctor can prescribe without hesitation for veg & non-veg patients
- ✓ Pure, safe, and culturally aligned therapeutic care

Reference: KDIGO Clinical Practice Guideline for Anemia in CKD

INTEGRAL THERAPEUTIC
Happier Healthier Harmony

Mr. Jain recalled his earlier ordeal with traditional iron pills—painful constipation, intense stomach burns, and distressing dark stools.

CONVENTIONAL ORAL IRON

- ✗ Severe stomach burning & acidity
- ✗ Hard, painful constipation
- ✗ Dark/black stools
- ✗ High discontinuation rate

FERROCEPT™ (LIPOSOMAL IRON)

- ✓ Zero GI irritation
- ✓ Non-constipating formula
- ✓ Clean tolerability profile
- ✓ High patient compliance

KEY CLINICAL TAKEAWAY

Better tolerability means no missed doses—ensuring steady hemoglobin rise.

INTEGRAL THERAPEUTIC
Happier Healthier Harmony

Mr. Jain was worried about that lingering, metallic rust taste and unpleasant nausea that usually made swallowing iron pills an everyday struggle.

THREE-PILLAR CLINICAL SCIENCE INFOGRAPHIC

Targeted Cellular Delivery

Delivered to cells using liposomal technology for rapid results

Tasteless & Odourless

No metallic burps, no foul taste, and no unpleasant smell for effortless daily compliance

Proven Safety Profile

No iron trapped in the liver, preventing ferritin toxicity and reducing transfusion dependence

KEY TAKEAWAY

Advanced Liposomal formulation ensures superior absorption with zero sensory discomfort.

COMPLETE THERAPEUTIC DOSAGE IN EVERY TABLET

Synergistic Multicomponent Support Tailored for Iron Deficiency in CKD

PRODUCT PACKSHOT & BRIEF SUMMARY

Key Highlights:

- Advanced Liposomal Delivery for Optimal Bioavailability
- 100% Non-Heme Vegetarian Iron Source
- Tasteless & Odourless Film-Coated Tablet

COMPOSITION & CLINICAL CONTRIBUTION TABLE

	Active Ingredient	Strength	% RDA	Clinical Role
1.	Ferric di-Phosphate (Liposomal) (Elemental Iron)	29 mg	100%	Replenishes iron stores; builds Hb safely
2.	Vitamin C	50 mg	76.92%	Enhances iron uptake & combats oxidative stress
3.	Folic Acid	129 mcg	99.68%	Essential for RBC maturation & DNA synthesis
4.	Vitamin B12	1.20 mcg	54.55%	Vital for nerve health & cellular energy

CLINICAL SUMMARY CARD

INCREASES HEALTHY RED BLOOD CELLS

Adequate iron, folate, and B12 restore healthy hemoglobin levels, allowing red blood cells to transport vital oxygen throughout the body, reviving daily energy and endurance for CKD patients.

Reference: KDIGO Clinical Practice Guideline for Anemia in CKD.

60 Days Later: Consistent, gentle therapy brought Mr. Jain's vitality back, enabling him to walk with ease and enjoy life with his family.

MR. JAIN'S 4 GOLDEN RULES TO "JIO KHULKE 365"

1. Adhere Daily to Prescribed Therapy

Take **Ferrocept** regularly as advised by your nephrologist without skipping doses.

2. Experience Zero Discomfort

Enjoy treatment free from black stools, nausea, metallic taste, or constipation.

3. Follow Kidney-Safe Nutrition

Maintain adequate hydration, low sodium intake, and prescribed renal dietary guidelines.

4. Track Your Blood Health

Schedule routine CBC, Ferritin, and Kidney Function Tests every 2-3 months.

CLOSING MOTIVATIONAL CALLOUT

Chronic Kidney Disease requires steady care, not compromise. Protect your blood, empower your heart, and live freely every single day!

FREQUENTLY ASKED QUESTIONS & RENAL NUTRITION GUIDE

Empowering CKD Patients to Manage Iron Safely Every Day

1. Clinical FAQs

Q1: Can I take Ferrocept alongside my other CKD medications?

Ans: Yes. However, always space it 1-2 hours apart from phosphate binders or antacids to allow optimal liposomal cellular absorption.

Q2: Why is Ferrocept gentle on the stomach when previous irons weren't?

Ans: Traditional salts release free iron that burns the mucosal lining. Ferrocept encapsulates iron in a lipid sphere, ensuring zero stomach burn, no nausea, and non-constipating digestion.

Q3: How long should I continue taking Ferrocept?

Ans: Complete the full course prescribed by your nephrologist to fully replenish your depleted iron stores and sustain healthy Hb.

2. CKD-Safe Anemia Nutrition (Renal-Friendly Choices)

SAFE VEGETARIAN IRON BOOSTS

- Washed green beans & peas
- Fortified whole grains
- Soaked lentils (within limit)
- Fresh cabbage & gourds

FOODS TO MONITOR / MODERATE

- High-potassium dried fruits (dates, raisins)
- High-phosphorus colas & processed cheeses
- Excess hidden salt in packaged papads/pickles (Limit salt < 5g/day)
